Experience

Piktogram Studio - January 2022 to April 2023

Junior Backend developer

- **Chess Challenge** (javascript, cordova, html, css)
 - Isolated and fixed game breaking problems, such as players move counter, written function that rewards players for quick completion of a given challenge and implemented ads reward system that allows skipping levels.
- **Piktogram WooCommerce Export** (php plugin for wordpress)
 - Created the plugin from the ground up using plain PHP. It exports all WooCommerce products into one CSV file, and zips all images for products within the same directory. Also, it allows users to import products using CSV and ZIP file combination.
- **Knauf Insulation survey** (php, mysql)
 - Implemented logic for dynamically skipping questions based on users answers. Handled possible errors, and added some security features for sql queries.

Develomon - April 2023 to September 2023

Junior PHP developer

- **Lugonja admin panel** (Symfony framework, Easyadmin, SQL)
 - Created fully working admin panel from the ground up for dermatological ordination. It had the features such as - patient preview and administration, making appointments, adding anamneses for patients, listing all patients with all of their appointments and medication, preview of catalogues with all therapies and medicaments, and printing anamnesis as pdf, or sending as email.

About Me

Entry-level backend developer adept at contributing to a collaborative work environment, and at determining customer satisfaction. Seeking to further expand knowledge and toolset needed for backend development.
